AI-Powered Accounting for Africa

AI-driven Accounting & Tax Automation
SYSCOHADA · Senegal & OHADA Zone (17 countries)

GITEX AFRICA 2026 · Marrakech

The Problem

80% of African accountants' time is spent on manual data entry

Massive manual entry

Hundreds of invoices processed by hand every month

Costly tax errors

Tax penalties, permanent non-compliance risks

Impossible to scale

Growth capped by manually processable volume

Inadequate tools

Sage, Cegid, Excel: no local tax automation

The Kora Metrics Solution

Humans always decide. AI proposes, the professional validates.

01

Digitization & Extraction

Upload invoices (PDF, scans, photos).
AI automatically extracts all data.

02

AI Tax Analysis

SYSCOHADA allocation, tax identification,
real-time anomaly detection.

03

Ready-made Declarations

Auto-generate VAT, CIT, withholdings.
Professional validates and submits.

Why Now?

Tax Digitalization

Senegal accelerating electronic tax declarations

AI Revolution

New technologies finally enable document analysis at scale

Industry Evolution

Industry professionals are increasingly demanding

Strong need for locally adapted solutions

We integrate domain expertise and technical knowledge

Competition & Differentiation

	Excel/Manual	Sage	Cegid	Kora Metrics
Invoice OCR	✗	✗	✗	✓
